PERSONAL PROFILE:

Recently completed BTEC level 3 as well as completing functional skills. I have a good understanding of Web development as well as some knowledge with the fundemental programming languages necessary for web development. I have some customer experience working in a part time job.

I am currently going through an online bootcamp where i am learning more about web development while making projects and creating a portfolio showcasing my skills. I am preparing for job searching as i practice my soft skills as i am attending career support.

After i complete this bootcamp, i aim to become a junior web developer and be able to work with clients and colleagues and be able to write clean and effiecent code.
